#### **Materiality**

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

#### **INTERNAL RISK FACTORS**

1. ***The loss, shutdown or slowdown of operations of our facility or the under-utilization of any such facility may have a material effect on our results of operations and financial condition.***

Our business and results of operations are dependent on our ability to effectively plan our manufacturing processes through job work and on our ability to optimally utilize our processing capacities for the various products we manufacture through job work. Any disruption to our manufacturing process or the operation of our production facilities may result from various factors beyond our control, including, among others, the following:

- Utility supply disturbances, particularly power supply;
- Forced close down or suspension of our manufacturing facilities due to factors such as breakdown or failure of equipment, performance below expected levels of output or efficiency, facility obsolescence or disrepair, labour disputes such as strikes and work stoppages, natural disasters and industrial accidents;

- Severe weather condition;
- Interruption of our information technology systems that facilitate the management of our manufacturing facilities; and
- Other production or distribution problems, including limitations to production capacity due to regulatory requirements, changes
- in the types of products produced or physical limitations that could impact continuous supply.
- Disturbance at our job work process.

Although our production facilities and our job work process have not experienced any material disruption in the past, there can be no assurance that there will not be any material disruption to our operations in the future. If we fail to take adequate steps to mitigate the likelihood or potential impact of these events, or to effectively respond to these events if they occur, our business, results of operations and financial condition could be materially affected, further we will not be able to achieve our sales as compared to previous years due to any disruption in our facilities and process.

In addition, our customer in India and outside India rely significantly on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. Any disruption of operations of our manufacturing facilities through Job work could result in delayed delivery of our products or defects in the garments delivered to our customers, which in turn may lead to disputes and legal proceedings with them on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. Although we have not experienced any dispute in the past but in case any matter arises in the future, our business and financial results may be adversely affected by any disruption of operations of our manufacturing facilities, on account of factors including any or all of the factors mentioned above.

For Further details, please refer to chapter titled “Business Overview” beginning on Page 95 of this Prospectus.

2. ***We have significant power requirements for continuous running of our factories. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.***

Our factory has significant electricity requirements and any interruption in power supply may disrupt our operations. Our business and financial results may be affected by any disruption of operations. We depend on third parties for all of our power requirements. Further, we have limited options in relation to maintenance of power back-ups such as diesel generator sets and any increase in diesel prices will increase our operating expenses which may impact our business margins.

Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost of factories and production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in area from where we operate due to which in case of a price hike we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition and results of operations.

For Further details, please refer to chapter titled “Business Overview” beginning on Page 95 of this Prospectus.

3. ***We are dependent on Job work for manufacturing of our Products, any disruption to our operations on account of Job work may have an effect on our business, results of operations and financial condition.***

We are fully dependent on Job work for manufacturing of our products. Initially the product is designed and sample is prepared at our facility after approval of design and make of our products, the raw material is purchased and sent to job work for preparation of bulk order pieces. After job work, the finished product is ironed & packed at our facility and sent for dispatch. Hence our preparation of bulk order is dependent on job worker and their availability. If there will be any interruption in job work process, we will be unable to complete our order and our financial conditions and business operations will be significantly affected.

Further if there is a hike in prices of job worker and difficulty in finding suitable job worker for manufacturing of our products, our cost of product will rise which ultimately affects our profitability of our Company. For Further details of our business processes, please refer to chapter titled “Business Overview” beginning on Page 95 of this Prospectus.

4. ***Our business is manpower intensive and any unavailability of our employees or shortage of labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing hiring of labour may have an adverse impact on our cash flows and results of operations.***

Our business is manpower intensive and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of labourers at our factories. Unavailability or shortage of such a pool of workmen or any strikes, work

stoppages, increased wage demands by workmen or changes in regulations governing hiring of labour may have an adverse impact on our cash flows and results of operations.

We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations.

Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with labourers at our manufacturing units. This may adversely affect our business and cash flows and results of operations.

For Further details, please refer to chapter titled “Business Overview” beginning on Page 95 of this Prospectus.

**5. *There are outstanding legal proceedings involving our Company and Group Company. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities.

We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, also we have our promoter group entities as our customers. we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

**9. *Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.***

Our top ten suppliers contributed approximately 45.09%, 65.93%, 55.93% and 46.99% of our total purchases for the period ended March 31, 2023, April 12, 2022, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost effective suppliers in normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While we believe we have maintained good and long term relationships with our other suppliers too, there can be no assurance that we will continue to have such long term relationship with them. ***10. We may not be able to adapt to changing market trends and customer requirements in the fashion market in a timely manner, or at all.***

The market for garment fashion in the country is highly competitive with several players present in various segments including through third party e-commerce platforms. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products and their prices on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. For instance, manufacturing for a season begins well in advance of the season and we may not be able to incorporate the prevalent trends, or accommodate any sudden emergence of a new trend that may be relevant to that season in the collection being released. If our competitors are able to cater to these markets, or if we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lower sales, higher inventories and higher discounts, each of which could have a material effect on our results of operations and financial condition.

Also we are yet to apply for contract labour license for Manufacturing Unit – I and Factory License for Manufacturing Unit - II.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. As of March 31, 2023, our long-term borrowings were ₹ 4.33 Lakhs & short-term borrowings were ₹5241.20 Lakhs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Information of our Company" on page 142 of this Prospectus.

Our Company has been availing unsecured loans from Directors, Promoter group and other parties from time to time. The total outstanding payable to them as on March 31, 2023 amounts to Rs. 1426.94 Lakhs. Although there are no terms and condition prescribed for repayment of unsecured loan which can be recalled at any given point of time during ordinary course of business and thus may affect the business operations and financial performance of our Company.

For further details regarding loans availed by our Company, please refer "Financial Information of our Company" on page 142 of this Prospectus.

**17. Any deficiency in our products could make our Company liable for client claims, which in turn could affect our Company's results of operations.**

Our Company is bound by the terms and conditions as placed before its clients. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these clients for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations.

**18. We have been recently converted into public limited company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.**

Our Company has been incorporated pursuant to the conversion of the Erstwhile Partnership firm under Part I Chapter XXI of the Companies Act, 2013 on April 12, 2022. Prior to conversion, the provisions of the Companies Act were not applicable to us. However, consequent to the aforesaid conversion, our Company is compliance with various provisions of the Companies Act. Though our Company will endeavour to take all possible steps comply with the provisions of the Companies Act, but in case of our inability to do so or in case of any delay, we may be subject to penal action from the appropriate authorities which may have an adverse effect on our financial and operational performance and reputation.

**19. We do not have any long-term agreement or contract of supply of raw materials and consequently are exposed to price and supply fluctuations for our raw materials.**

Our Company is engaged in the business of manufacturing of readymade cloths, and fabric is used as the primary raw material during our manufacturing process. Therefore, we are highly dependent on fabric, and it forms the most important and primary component of our manufacturing process.

We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacturing of our products, could have a material adverse effect on our business. Further, any discontinuation or a failure of these suppliers to adhere to the delivery schedule or failure to deliver the required quality and quantity could hamper our manufacturing schedule.

Further, we are also exposed to fluctuations in the prices of fabric. Thus, we may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our products becoming unaffordable if pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our margins. Upward fluctuation of price of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial conditions and results of operations.

**20. Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of purchase orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.**

Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers. However, we have not entered into any long term contracts with these customers and we cater to them on purchase order basis. We are bound to comply with different terms and conditions stipulated in the purchase orders failing to which led to termination or cancellation of the purchase orders by our customers. Our customers may also terminate their relationships with us without any notice which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, timely delivery of our products, etc., in the absence of contracts, any sudden change in the buying pattern of customers could adversely affect the business and the profitability of our Company.

**21. *We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.***

We receive in foreign currencies during the normal course of business for selling products to our global customers at mutually agreed prices. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our Company to the extent of cost of goods and sales in foreign currency terms. Although we generally hedge our foreign exposure, any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

**22. *There have been some instances of delays in the past with certain statutory authorities and non-compliances with certain provision of statutory regulations applicable to us. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

In the past, there have been some instances of delays in filing statutory forms with the RoC with additional fees and penalty. In addition to above, our Company has inadvertently filed incorrect Authorized Capital in MOA while filing conversion of Partnership into Company, although the correct authorised capital is updated on MCA portal as on date.

In Addition to that, our Company has taken loan from Promoter Group Companies and Entities was taken under the erstwhile partnership firm and afterwards the loan was repaid after conversion of partnership to Company. Also we have delayed in depositing the EPF with the concerned offices of the departments on several instances and have accordingly been subjected to penalty and charged with interest for delayed deposit of tax on few instances. While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance and instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Prospectus.

We cannot assure you that legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

**23. *We may not be able to prevent unauthorised use of trademarks obtained/ applied for by third parties, which may lead to the dilution of our goodwill.***

We have obtained trademark registrations of our brands, including "KARNIKA" under class 25 & 35 under the Trade Marks Act, 1999 ("Trade Marks Act"), any unauthorized use of our trademarks, by unrelated third parties may damage our reputation and brand. Preventing trademark infringement, particularly in India, is difficult, costly and time-consuming. Also we have entered in assignment agreement with our promoter for use of one trademark under class 25 which is registered on name of Mr. Niranjana Mundhra. The measures we take to protect our trademarks may not be adequate to prevent unauthorized use by third parties, which may affect our brand and in turn adversely affect our business, financial condition, results of operations and prospects.

Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

For further details please refer to chapter titled "Government and Other Approvals" beginning on page 192 of the Prospectus.

**24. *Our inability to manage inventory in an effective manner could affect our business.***

Our business model requires us to maintain a certain level of inventory of our raw material, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

**25. Our director and Promoters have provided personal guarantees and Personal Property for loans availed by our Company. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal guarantees and personal property.**

Our director and promoters have provided personal guarantees and personal property to secure our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our director and their relative may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. Also if our Directors and promoters revoke their personal guarantees and property & we may not be successful in procuring alternate guarantees and property to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

For further details regarding loans availed by our Company, please refer “Financial Information of our Company” on page no. 142 of this Prospectus.

**26. Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.**

As on March 31, 2023, our total secured borrowings amounted to Rs. 3818.58 Lakhs from Banks. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and
- Our financing agreements require us to obtain the consent of, or to intimate, our lenders for certain actions including change in shareholding or directorship of our Company, remuneration to Directors, drawdown of further loans, issuance of guarantees, and for certain corporate actions, including alterations to our Memorandum and Articles of Association, Payment of Dividend and balance of unsecured loan of Director. Our failure to comply with financial or restrictive covenants or periodic reporting requirements or to obtain our lenders’ consent to take certain actions in a timely manner or at all may result in declaration of an event of default by any current or future lenders, which may accelerate repayment or increase applicable interest rates or trigger cross-default or cross-acceleration under other financing agreements.

Although we have not experience any disruption in our loan facility in past, but termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, please refer chapter titled “Financial Information of our Company” beginning on Page 142 of this Prospectus.

**27. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.**

The market in which our Company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

**28. *Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India and other parts of world & other situation due to pandemic Covid-19.***

Our overall performance depends on the economic conditions of India in relation to garments industry. Certain economies have experienced periods of downturn due to the situation prevailed in India and outside India due to pandemic disease of Covid-19 which impacts financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, increases in unemployment, volatility in commodity prices and worldwide stock markets, and excessive government debt. The pandemic disease has adversely affected our business.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy have a material adverse effect on our business, operating results and financial condition.

**29. *We depend on third parties for a major portion of our transportation needs. Any disruptions may affect our operations, business and financial condition.***

We rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of raw material from our suppliers, sending & receiving back the product from job work and for transportation from our finish products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any transport service providers and engage them on a need basis. Additionally, availability of transport solutions in the market we operate in is typically fragmented. We do not enter into written documentation in relation to the transportation services we hire which poses various additional risks including our inability to claim insurance. Further, the cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost effective manner. Accordingly, our business is vulnerable to increased transportation costs including as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other events.

Although we have not experienced any disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby affecting our operations and profitability.

**30. *Our marketing and advertising campaigns may not be successful in increasing the popularity of our products and offerings. If our marketing initiatives are not effective, this may adversely affect our business and results of operations.***

Our revenues are influenced by our marketing plans including advertising and fashion shows. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. In addition, the support of our employees is also critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programmes and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business, financial condition, results of operations and prospects.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate, could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business and results of operations.

**31. *There may be potential conflicts of interest if our Promoters or Directors are involved in any business activities that compete with or are in the same line of activity as our business operations.***

Our Group Company and Promoter Group Entities Sri Karni Apparels Private Limited, Q Baazar India LLP, Shree Garments and Shri International are involved in business of garment manufacturing. Also our Company has entered into various transaction such as purchase and sale in past with our Group Company and Promoter Group Entities and will continue to do in

future. For detailed information for our transaction with Promoter Group Entity please refer to Annexure X of Restated Financial Statement under chapter titled “Financial Information of our Company” beginning on page 142 of this Prospectus.

There can be no assurance that our Promoters or our Promoter Group Entity or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates and quotations received from various vendors. ***33. Our success is dependent on our Promoter, management team and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter or Managing Director and Whole Time Director may have an adverse effect on our business prospects.***

Our Promoter, Managing Director, Whole Time Director and management team have significantly contributed to the growth of our business, and our future success is dependent on the continued services of our management team. Our Managing Director Mr. Nirajan Mundhra and whole-time Directors Mr. Shiv Shankar Mundhra & Mr. Mahesh Kumar Mundhra are having experience of 07 years each in textile Industry which turn out beneficial for the Company. An inability to retain any key managerial personnel may have an adverse effect on our operations. Our ability to execute contracts and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be unable to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects.

For further details of our Promoters and Management, please refer chapter titled “Our Promoters and Promoter Group” and “Our Management” beginning on Page 136 & 123 of this Prospectus.

***34. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.***

The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition.

The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

***45. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.***

Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

***47. We are susceptible to risks relating to unionization of our workers employed by us.***

None of our workers are currently represented by a recognized collective bargaining agreement. We cannot assure you that our workers will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. For detail, please refer "Outstanding Litigations and Material Development" beginning on page 186 of this Prospectus. Any such penalty arising in future may lead to financial loss to our Company.

***49. We have not identified any alternate source of raising the working capital mentioned as our 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, please refer chapter titled "Object for the Issue" beginning on Page 70 of this Prospectus.

**50. *Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.***

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as described in "Objects of the Issue" on page 70 of this Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. But the Audit Committee will review the monitor the use of Issue Proceeds. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. For further details of the proposed objects of the Issue, please refer the chapter titled "Objects of the Issue" beginning on Page No. 70 of this Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoter or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

**52. *Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 13.46% of the Issue Proceed. As on date we have not identified the use of such funds.***

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is determined considering various financials factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment

***57. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document

or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

**58. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see “Basis for Issue Price” beginning on page 75 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

**59. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

**60. *The requirements of being a listed company may strain our resources and distract management.***

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

## **EXTERNAL RISK FACTORS**

### ***61. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.***

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or our industry.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

### ***62. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

### ***63. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.***

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the "CCI"). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the "Combination Regulation Provisions"), which came into effect from June 1, 2011. The

Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

**64. *The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.***

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

**65. *You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.***

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

**66. *Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.***

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the Textile industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India’s economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

**67. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.**

The Ministry of Corporate Affairs (“MCA”), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 (“Ind AS”) which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

**68. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.**

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India’s principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

**69. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.**

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations’ debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a

lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

***70. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.***

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

**Justification of increase in working capital requirement:**

The Increase in working capital requirement for FY 2023 as compared to FY 2022 was due to following reasons:

- The Turnover was increased from ₹9880.93 Lakhs in FY 2022 to ₹13095.95 Lakhs in FY 2023 which is primary factor for increase in working capital requirement.
- Secondly, increase in Cash and Cash equivalents to maintain liquidity in business for purchasing raw material at reasonable prices.
- Balance with Revenue Authority under other current assets increases substantially with regard to increase in sales and scale of operations. The increase is due to increase in export sales and inventory holding period, the GST Credit, Duty Drawback and ROSCTL (Rebate of State and Central Taxes and Levies) Receivables has been increased for the FY 2022-23. ### GLOBAL OUTLOOK

#### A Rocky Recovery

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia’s invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks’ generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist.

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2, panels 1 and 2). Russia’s invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID-19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperiled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions. Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID-19 in the second quarter (Figure 1.2, panel 3).

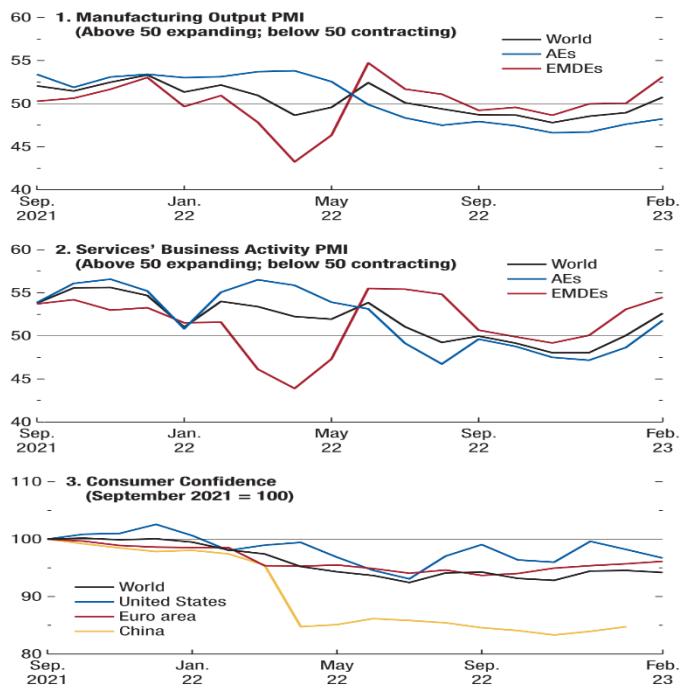

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central bank’s tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geoeconomic fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

### Inflation Is Declining with Rapid Rate Rises but Remains Elevated amid Financial Sector Stress

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline (see Figure 1. SF.1). To dampen demand and reduce underlying (core) inflation, the lion's share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis (Figure 1.4). This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries (see Box 1.1). Inflation excluding volatile food and energy prices has been declining at a three-month rate—although at a slower pace than headline inflation—in most (though not all) major economies since mid-2022.

Even so, both headline and core inflation rates remain at about double their pre-2021 levels on average and far above target among almost all inflation-targeting countries. Moreover, differences across economies reflect their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched.

The effects of earlier cost shocks and historically tight labor markets are also translating into more persistent underlying price pressures and stickier inflation. The labor market tightness in part reflects a slow post-pandemic recovery in labor supply, with, in particular, fewer older workers participating in the labor force (Duval and others 2022). The ratios of job openings to the number of people unemployed in the United States and the euro area at the end of 2022 were at their highest levels in decades (Figure 1.5). At the same time, the cost pressures from wages have so far remained contained despite the tightness of labor markets, with no signs of a wage-price spiral dynamic—in which both wages and prices accelerate in tandem for a sustained period—taking hold. In fact, real wage growth in advanced economies has been lower than it was at the end of 2021, unlike what took place in most of the earlier historical episodes with circumstances similar to those prevailing in 2021, when prices were accelerating and real wage growth was declining, on average.

 Note: The figure shows the distribution (25th to 75th percentiles, median, and weighted average) of the annualized average percentage point change in policy rates by economy group over two episodes: May 2004 to July 2007 (pre-GFC) and Jan. 2022 to Jan. 2023 (post-COVID). AEs = advanced economies; EMDEs = emerging market and developing economies; GFC = global financial crisis; PPPGDP = nominal gross domestic product in purchasing-power-parity international dollars.

### A Challenging Outlook

A return of the world economy to the pace of economic growth that prevailed before the bevy of shocks in 2022 and the recent financial sector turmoil is increasingly elusive. More than a year after Russia’s invasion of Ukraine and the outbreak of more contagious COVID-19 variants, many economies are still absorbing the shocks. The recent tightening in global financial conditions is also hampering the recovery. As a result, many economies are likely to experience slower growth in incomes in 2023, amid rising joblessness. Moreover, even with central banks having driven up interest rates to reduce inflation, the road back to price stability could be long. Over the medium term, the prospects for growth now seem dimmer than in decades.

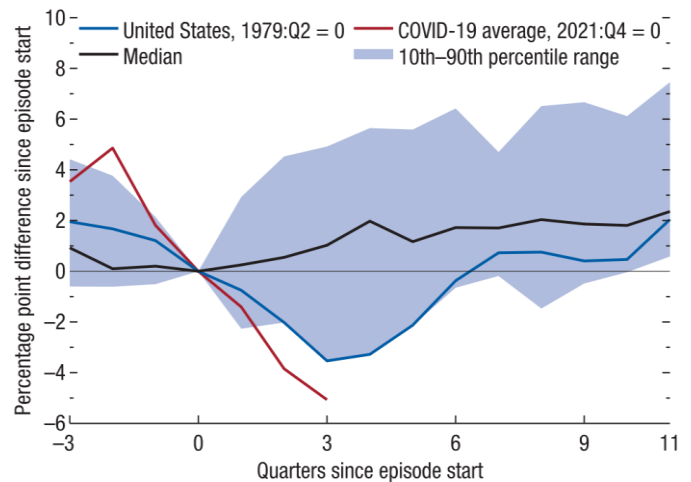

This section first describes the baseline projections for the global economy and the assumptions on which they are predicated. The baseline scenario assumes that the recent financial sector turmoil is contained and does not generate material disruptions to global economic activity with widespread recession (a broad-based contraction in economic activity that usually lasts more than a few months). Fuel and nonfuel commodity prices are generally expected to decline in 2023, amid slowing global demand (see the Commodity Special Feature). Crude oil prices are projected to fall by about 24 percent in 2023 and a further 5.8 percent in 2024, while nonfuel commodity prices are expected to remain broadly unchanged. The forecasts are also based on the assumption that global interest rates will stay elevated for longer than expected at the time the October 2022 WEO was published, as central banks remain focused on returning inflation to targets while deploying tools to maintain financial stability as needed (Figure 1.12). Governments are on average expected to gradually withdraw fiscal policy support, including, as commodity prices decline, by scaling back packages designed to shield households and firms from the effects of the fuel and energy price spikes in 2022.

At the same time, in consideration of the elevated risks and uncertainties stemming from the recent global financial market turmoil, this section also places strong emphasis on a plausible alternative scenario that illustrates the impact of downside risks materializing.

### Feeble and Uneven Growth

#### Baseline Scenario

**Figure 1.6. Wage-Price Spiral Risks Appear Contained So Far**  
(Distribution of real wage growth across historical episodes similar to today)

Sources: International Labour Organization; Organisation for Economic Co-operation and Development; US Bureau of Economic Analysis; and IMF staff calculations.  
 Note: The figure shows the evolution over time of historical episodes similar to 2021 in which three of the preceding four quarters had (1) rising price inflation, (2) falling real wages, and (3) stable or falling unemployment. Twenty-two such episodes are identified for a sample of 30 advanced economies from 1960 to 2021. See Chapter 2 of the October 2022 *World Economic Outlook* for more details. The COVID-19 line shows the average behavior for economies in the sample starting in 2021:Q4.

The baseline forecast is for global output growth, estimated at 3.4 percent in 2022, to fall to 2.8 percent in 2023, 0.1 percentage point lower than predicted in the January 2023 WEO Update (Table 1.1), before rising to 3.0 percent in 2024. This forecast for the coming years is well below what was expected before the onset of the adverse shocks since early 2022. Compared with the January 2022 WEO Update forecast, global growth in 2023 is 1.0 percentage point lower, and this growth gap is expected to close only gradually in the coming two years (Figure 1.13). The baseline prognosis is also weak by historical standards. During the two pre-pandemic decades (2000–09 and 2010–19), world growth averaged 3.9 and 3.7 percent a year, respectively.

For **advanced economies**, growth is projected to decline by half in 2023 to 1.3 percent, before rising to 1.4 percent in 2024. Although the forecast for 2023 is modestly higher (by 0.1 percentage point) than in the January 2023 WEO Update, it is well below the 2.6 percent forecast of January 2022. About 90 percent of advanced economies are projected to see a decline in growth in 2023. With the sharp slowdown, advanced economies are expected to see higher unemployment: a rise of 0.5 percentage point on average from 2022 to 2024 (Figure 1.14).

For **emerging market and developing economies**, economic prospects are on average stronger than for advanced economies, but these prospects vary more widely across regions. On average, growth is expected to be 3.9 percent in 2023 and to rise to 4.2 percent in 2024. The forecast for 2023 is modestly lower (by 0.1 percentage point) than in the January 2023 WEO Update and significantly below the 4.7 percent forecast of January 2022. In low-income developing countries, GDP is expected to grow by 5.1 percent, on average, over 2023–24, but projected per capita income growth averages only 2.8 percent during 2023–24, below the average for middle-income economies (3.2 percent) and so below the path needed for standards of living to converge with those in middle-income economies.

## **INDIAN ECONOMY OVERVIEW**

### **Introduction**

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

### **Market size**

- India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY2021-22,
- India is the third-largest unicorn base in the world with more than 100 unicorns valued at US\$ 332.7 billion, as per the Economic Survey.
- The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030s, for productivity and economic growth according to McKinsey Global Institute. The net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.
- According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

## Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. ## Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from

15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

## **TEXTILE INDUSTRY IN INDIA**

### **Introduction**

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

### **Market Size**

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. ### **Duty Drawback Scheme**

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the “Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all industry rate or duty drawback rate, or where the all industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

## PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

Pursuant to the UPI Circular, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 and till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediaries and use his / her UPI ID for the purpose of blocking of funds. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

**Phase III:** The commencement period of Phase III is notified vide SEBI Circular SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 effective from issue opening on or after September 01, 2023 on voluntary basis and on or after December 01, 2023 on mandatory basis for listing in T+3 days.
